

Ms. Carol's Pre-K 2 April 2026 News

Spring has definitely sprung in our classroom! In the month of April, we will continue our love of nature as we celebrate Earth Day, nurture a seed to a plant in our own “greenhouse”, and observe the journey of a butterfly from a chrysalis.

We will open our classroom window everyday to a new scene from the busy squirrels running around our park to watching the rain shower the beautiful flowers. With our scientific tools in hand, we will have so much learning and growing too!

The color YELLOW will burst throughout our art projects. We will continue on our number line to the number 9. We are expert counters! An OVAL will be the perfect shape for our imaginations to identify the “hatching” of baby chicks, very hungry caterpillars, tiny dinosaurs, slithery snakes, and fast fishes.

We are so EXCITED to showcase our talent during our “Let It Grow” program that is scheduled for Tuesday, April 14th. We will have a short reception following the performance that will include pictures and light food and refreshments! The program will start at 9:00am sharp!

Bowman Academy Important Dates:

4/3 - Non-Student Day – Bowman Closed

4/14 – Ms. Carol's “Let It Grow” Class Program – 9:00am

As always, THANK YOU so much for all your support and for entrusting us with your lil’ angels!

Sincerely,
Ms. Carol
